90-113A

DB ENTRY COMPLETE

NO CORE MATCHES THIS X-RADIOGRAPH

LOGGED FROM X-RADIOGRAPH

Core ID SFB 020790-14 90-113A	Depth	Date Processed 010604 + 061206
ation SAN PABLO BAY	Core Length 1.815 m	Photo
Sheet 1 of 3		

General Description

THE TWO X-RADIOGRAPHS OF THIS CORE WERE NOT MARKED A+B BY ANIMA/CLIFTON. I MARKED ONE SEGMENT AS "B" BECAUSE IT HAS A NOTCH ↑ AT ITS BASE AS DO MANY OTHER B-SEGMENTS. THE OTHER SEGMENT I MARKED AS "A". I ORIENTED THE "A" SEGMENT BASED ON DOWN-TURNED EDGES OF STRATA. THE TWO X-RADIOGRAPHS MARKED WITH SFB 020790-14 ARE TWO COPIES OF THE SAME CORE SEGMENTS. WHICH CORE IS H > PROPERLY.
