MEMORANDUM

April 2, 1997

To: Ben Hankins
VHZ Rock Storage Representative

From: Bob Christiansen *Chris*

Subject: Samples for storage

I have 35 boxes of samples to be stored in the Division Rock Storage Facility. These samples from 3 collecting areas—the Yellowstone Plateau region, the eastern Snake River Plain, and the southern Cascade Range—all represent areas still under study in my project. This archive collection is used to select samples for petrologic study and is well documented by field notes and maps in my possession. All of these boxes should remain in storage until completion of the project.

IGP Menlo, 9:32 AM 10/16/92, Old sample splits to be discarded by BGC

1

To: IGP_Menlo
From: jimsgp@mojave.wr.usgs.gov (Jim Smith (415) 329-5230)
Subject: Old sample splits to be discarded by BGC
Cc:
Bcc:
X-Attachments:

"In the old days" BGC in Menlo Park sent left over sample splits to the warehouse for storage. They have now decided to discard these old splits. The splits will probably be discarded within the next few weeks to a month. The splits to be discarded were stored between about 1977 and 1983. Unfortunately, identification on the boxes is almost entirely by BGC job numbers. Therefore, in most cases to identify your samples, you must know the BGC job number. A very few boxes, all from 1977, have names of IGP people on them. The names are Banks, Bacon, Beeson, Bateman, Christiansen, Coleman, Duffield, Macloed, Miller (Tom).

The list of what is to be discarded will be in Sheri Coon's office if you wish to consult it.

Sat - 10/18/92

Jim -
I don't know how critical timing is. I will be gone most of the next 2 weeks. How do I get word that I want these splits back? Can you forward the list for me?

Thanks,
Chris

1

Bob,

Thanks again for calling about powders that I have stored in Menlo. It would have seriously impacted my research had you thrown the powders away. After several years of collecting samples and getting chemical analyses, I finally have an opportunity to acquire isotopic analyses of some of them. The destruction of the powders would have set me back several months or years.

If you have any the jobs in the first group below, please send them to me as soon as possible. The other jobs can be sent to me through Western Regional Geology at a later date. Thanks a million.

Group 1- send as soon as possible.

These are White Mountain volcanic field samples that I will be doing isotopic analyses on this spring.
